

New, **Breakthrough**
Cholesterol Test

The
VAPTM
Cholesterol Test

Can Save Your Life

The VAP™ Cholesterol Test Identifies More People At Risk For Heart Disease

The new, VAP Cholesterol Test identifies more people at risk than the routine cholesterol test. Like the routine cholesterol test, the VAP Test measures total cholesterol, HDL, LDL, and triglycerides. But the VAP Test provides much more information, including measurements of important lipoproteins and subclasses, and hereditary risk factors.

This additional information will help identify risk early so you and your physician can develop the most appropriate treatment plan to help you to avoid a cardiac event.

The VAP Cholesterol Test Provides More, Accurate Information

Cholesterol Measurements	The VAP Test	Routine Test
HDL	●	●
LDL	●	●
VLDL	●	●
Total Cholesterol	●	●
Triglyceride	●	●
LDL-R	●	
Lp(a)	●	
IDL	●	
R-LDL Subclass Pattern	●	
HDL ₂	●	
HDL ₃	●	
VLDL ₁₊₂	●	
VLDL ₃	●	

For the most accurate, and complete assessment of your risk for heart disease, ask your doctor for the VAP Cholesterol Test. Why take the risk? Take the VAP.
